EDUCATION

Illinois State University

Master of Business Administration (STEM-Designated)

Normal, Illinois

Expected, May 2027

Bangladesh University of Professionals

Bachelor of Business Administration | Marketing

Dhaka, Bangladesh

| GPA: 3.64

PROJECT EXPERIENCE

■ Demand Forecasting & Error Analysis (Excel)

Applied forecasting techniques on historical data to estimate future demand and evaluated model accuracy using error measures. Proposed its application to university event dining operations to improve inventory planning and reduce food waste.

■ Inventory Optimization under Demand Uncertainty (Simulation-Based)

Built a single-period inventory model to determine optimal ordering levels that balance stockouts and excess inventory. Evaluated profit implications under uncertain demand conditions.

■ Service System Optimization for Coffee Shop Operations (Queueing Simulation)

Simulated customer arrival and service processes under single-server and multi-server configurations to evaluate waiting times, throughput, and system congestion. Compared staffing and service design alternatives to assess trade-offs between cost and service efficiency.

■ Business Risk & Profitability Simulation for Retail Operations (Monte Carlo)

Modeled revenue uncertainty and cost variability for a fast-food business scenario using Monte Carlo simulation to estimate profit distribution and measure potential losses under different cost scenarios.

■ Optimization & Capacity Planning Model (Excel Solver)

Built linear programming models to optimize resource allocation and improve operational efficiency under real-world capacity constraints.

PROGRAMMING APPLICATION

■ Data Analysis using R

Applied data wrangling, transformation, and exploratory data analysis on multiple business datasets using R, including missing value treatment, variable transformation, summary statistics, and data visualization to support descriptive and predictive insights.

■ Savings Calculator App (Python)

Designed and developed an interest calculator to compare returns across investment options and enable informed investment decisions.

PROFESSIONAL SKILLS

Business Tools: Excel (Pivot Tables, Solver), PowerPoint, Word, Outlook, R Studio, Power BI

Core Skills: Problem Solving, Multi-tasking, Attention to Detail, Adaptability & Learning

Programming: Python, R, SQL

Analytical: Data Preparation, Data Wrangling, Statistical Modelling, Predictive Analysis

Operations mgt: Monte Carlo Simulation, Linear Programming, Clustering, Waiting Line Analysis, Quantitative/Time-series Forecasting.

WORK EXPERIENCE

Illinois State University, Dept. of Marketing

Graduate Assistant

Normal, Illinois

August 2025-Present

- Met competing project deadlines through strong organization and attention to detail.
- Ensured timely course operations by supporting grading and exam proctoring.
- Improved research workflow efficiency by sourcing, organizing, and synthesizing scholarly articles for faculty.
- Enhanced accessibility for students requiring accommodation by aligning course content with ADA compliance standards.

Mentors' Education Limited

Part-time Instructor (IELTS)

Dhaka, Bangladesh

June 2023-July 2025

- Reinforced problem solving and analytical thinking by mentoring students on test strategies and improving performance through 400+ classes.
- Supported course-coordinators' decision-making by tracking class and student performance data.
- Facilitated collaboration and communication by partnering with students, staff, colleagues, and other instructors.

Mousumi Agrovet Limited

Interim Operations & Administrative Lead

Dhaka, Bangladesh

June 2021-March 2022

- Maintained productivity by overseeing operations, safety and labor regulations for over 120+ workers.
- Prevented disruptions and supported bank-led business closure and liquidation through coordination with regulators and stakeholders during wind-down.

Transcom Beverages Limited

Sales & Marketing Intern

Dhaka, Bangladesh

February-March 2020

- Enabled cross-functional coordination across sales, marketing, and HR.
- Informed data-driven decision-making by analyzing sales data and KPIs to identify trends.

CERTIFICATIONS & LEADERSHIP

Python for Everybody Specialization – Coursera (University of Michigan)

Data Analytics Courses – Coursera (UMich, Johns Hopkins, Google)

Successfully completed Aspire Leaders Program 2023 – Aspire Institute

Work Authorization: *F-1 Visa, eligible to work in the U.S. on CPT for internships (no sponsorship required).*
